Description:

Chronic fatigue syndrome (CFS) is a serious, complex medical disorder. Chronic fatigue syndrome (CFS) is a debilitating illness with unknown origin.

Expert suggested that disease developed in genetically vulnerable individuals who exposed to a triggering event, such as infection, traumatic injury, emotional trauma, hormonal changes, environmental conditions and/or chemical exposure.

The official medicine recommends general principles of supportive management, treat the major disabling symptoms, encourage patients to "pace" activity to prevent deconditioning without precipitating relapse.

We offer different approach. We use only natural supplements the highest quality. We not only manage symptoms we are looking for initial impact which one trigger this pathology.

Multiple treatment modalities it is included low dose immunotherapy, neural therapy, prolotherapy, ozone therapy, deep detoxification which could be oral, intramuscular and intravenous injection.
